

Please do not take our right to have the local weather and traffic stations on XM away. I live by my XM as I drive a big rig and have waited for quite some time to have the local traffic available without having to go to a local station to get it. It doesn't include all the other stuff that goes with having to listen to a local station. It is strictly traffic and weather and that is all I need to hear. I travel to Los Angeles regularly and I would not be able to get around without XM's addition of the traffic channel. They are more complete and detailed about the reports than the local stations as they do not pretend to think that everyone listening is from the local area and knows where all the problems are without any explanations. Please do not take anything away from our XM radio. This is the greatest invention since the radio itself. Last year my truck was broken into. The thief(ves) took my CB radio, my stereo, etc. They weren't aware of the XM capabilities as the receiver/antenna were hidden. I had to go first to have my window replaced, which was broken to gain access. The very next thing I did was replace my stereo as I could not go anywhere without my XM. Last, I replaced the CB, but that was miles down the road. XM is not hurting anyone by offering this service to its loyal listeners and that is almost everyone now days. Thank you for your time. Debbie Gilbert
